BLANCO turns a sink into a creative hub.

Quality and comfort for the heart of the kitchen.

Sink: SUBLINE 500-IF SteelFrame, SILGRANIT® PuraDur®, Anthracite
Tap: LINEE-S, Chrome

On average, 60% of the time spent in the kitchen is spent at the sink.

Since the kitchen sink and tap serve as the base for some of the most important functions of everyday life, and we spend a lot of our time using them, it's important to make the right choice.

The kitchen is the hub of the modern family home and the sink is at its heart. The combination of sink, tap, waste management systems and clever accessories create this practical hub.

From food and drink preparation, washing up and cleaning, to flower arranging and bathing babies – finding that perfect balance between practicality and aesthetics isn't easy. That is why BLANCO have created solutions for all spaces, designs for all tastes and innovations in materials and finishes that perform beautifully.

Six tips for making the right sink choice.

Optimising optimum space for ease of use. A cabinet width of 60cm is ideal for most sinks with a main and additional bowl but BLANCO have countless designs, e.g. for corners or narrow sink cabinets and short projection units – we offer plenty of alternatives for maximising the available space.

Ergonomics and functionality make life easier. Make light work of washing up and food preparation with a BLANCO sink. Opt for single, multiple or partitioned bowls. Choose between sinks (bowl and drainer) or bowl only versions – all with clever accessories and all designed to make life in the kitchen easier.

Add style with material and colour. BLANCO always offers plenty of inspiration and the opportunity to express yourself through colour options, material choices and finishes to suit your taste and your lifestyle. Whether you choose classic Stainless Steel, the beautifully tactile SILGRANIT® or high quality Ceramic in a range of colours.

Cleaning made easy. Top-quality materials and strong, user-friendly BLANCO surfaces minimise the effort required for cleaning. Dirt and water find it hard to remain on the surface, helping to prevent against limescale and marks. Common household cleaning products make light work of keeping your sink looking beautiful.

The right installation method for every requirement. Undermount bowl installation provides a flawless look. Highly practical inset products offer flexibility while our tailor-made STEELART® worktops with integrated bowls present precision and expertise. Coordinated solutions for life in the kitchen means you can achieve something extraordinary.

Convenience in a system. The perfect synergy between individual elements is what turns a sink into a functional hub. Achieved by adding high quality taps and waste systems along with ingenious accessories. Whatever your style or budget, a BLANCO sink and tap will prove to be an investment in your home and your lifestyle.

A corner solution for perfect utilisation of the available space.

The cutting board and multifunctional colander can easily be moved.

Perfect synergy: super durable Stainless Steel Durinox® bowl paired with a brushed inset edge to match the tap.

For a stunning, yet subtle look choose an undermount sink with solid surfaces like Granite, composites or natural wood.

From smart and hot taps to semi-professional and classic mixer taps, BLANCO taps are award winning.

Even the waste separation is perfectly organised – thanks to SELECT, BLANCO's waste management system.

Recognised for quality,

Classic. Timeless. Beautiful.

BLANCO Stainless Steel sinks and bowls.

Sink: ANDANO 340/180-IF, Stainless Steel
Tap: CARENA-S, Chrome
Accessory: Colander Stainless Steel

With over 95 years' experience in kitchen technology, design and manufacturing, BLANCO offers the ultimate in Stainless Steel quality and craftsmanship. A Stainless Steel sink is classic, timeless and integrates beautifully in any kitchen environment.

Stainless Steel has a natural appeal with excellent characteristics that make it the perfect material for kitchen sinks.

BLANCO only uses the highest quality, selected in accordance with specific criteria and is subject to strict quality checks.

The results are first-class BLANCO Stainless Steel sinks that meet the highest requirements for material, functionality and design. BLANCO Stainless Steel sinks are made to last a lifetime.

Premium quality
BLANCO uses only the highest quality Stainless Steel. Rigorous quality checks and finishing processes ensure that every sink is pure quality.

Hygienic
BLANCO Stainless Steel is smooth and pore-free. The use of Stainless Steel in the food industry stands for its exceptional hygienic properties.

Safe for food use
Stainless Steel affects neither the appearance nor the flavour of food.

Robust
Stainless Steel is robust. Any dishes that drop onto it will not break easily as impacts are absorbed.

Resistant
High-quality BLANCO Stainless Steel has a natural resistance to common household acids and stains e.g. coffee, tea, fruits and vegetables.

Easy care
Stainless Steel products by BLANCO retain their value and brilliance for decades with the minimum care.

Heat-resistant and non-fading
Stainless Steel is heat-resistant to 300°C and will not change even in extended sunlight.

Rustproof
Properly maintained Stainless Steel will not rust. Any flecks that form on the surface are extraneous rust, and can easily be removed.

Self-healing
Stainless Steel is constantly renewing itself. The self-healing surface, known as the passive layer, regenerates constantly under the influence of oxygen.

Sink style options

-  **Inset:** Frame sits on top of work surface. These sinks are compatible with any work surface, including laminate.
-  **Undermount:** Installed underneath the worktop. For solid surface worktops such as granite or solid wood.
-  **Belfast:** Belfast sinks are installed either 'dropped-on' to a purpose-built cabinet or by using installation brackets.

-  **IF and IF/A:** Unique 1mm flat edge profile.
-  **IF:** The 1mm edge of the sink sits flat on the worktop.
-  **IFU:** Suitable for both inset and undermount installation.

Sink: CRONOS XL 8-IF, Stainless Steel
Tap: BLANCOCULINA-S Duo, Chrome

Bowl: CLARON 500-U, Stainless Steel Durinox®
Work surface: Bespoke, STEELART® worktop in Durinox® finish

It's all in the detail. Perfectly crafted STEELART® sinks and bowls are produced from a single sheet of premium quality 304 series, 18-gauge Stainless Steel by our highly experienced team in Germany.

The hand-crafting process, rather than the faster and more common machining processes, allow our design team to really express themselves.

From bespoke, made-to-measure Stainless Steel work surfaces to sinks, bowls and even a modern reinvention of the apron-fronted farmhouse style. The BLANCO design team have used bolder shapes, stronger lines, zero radius corners and even included some customisable elements. BLANCO STEELART® really is, kitchen design at its finest.

Right angle corners and perpendicular lines become a possibility when hand-crafting Stainless Steel.

Unlike formed sinks and bowls, the expertise that goes into STEELART® means we can achieve zero radius corners.

The CRONOS range of undermount or inset farmhouse style, apron fronted bowls bring a country classic right up to date.

For a real impact piece in your kitchen design, a sweeping expanse of perfectly formed Stainless Steel is simply stunning.

Ultra stylish and uber-practical, STEELART® expertise means delicate details, as with the rim of the ATTIKA, become possible.

Even the BLANCO range of accessories has been given a STEELART® upgrade in the form of this separate drainer.

A beautifully practical revolution. Durinox® by BLANCO STEELART®.

BLANCO STEELART® presents a unique material innovation in the form of Durinox®. With its pure Stainless Steel surface, finished using state-of-the-art technology, Durinox® is visually beautiful, tactile and durable. Compared to conventional Stainless Steel, the surface is more resistant to scratches and less susceptible to fingerprints making it easier to care for and clean.

The benefits of Durinox® at a glance:

- Enhanced scratch-resistance: over twice as hard as conventional Stainless Steel surfaces
- Less impervious to fingerprints than conventional Stainless Steel surfaces
- Easy to care for and clean

Shot blasting technology that BLANCO has adapted from the aerospace industry.

The stunning CLARON family of Durinox® undermount and inset bowls feature corners with a gentle radius for a contemporary look.

The ZEROX range of undermount bowls in Durinox® offer zero radius corners for a truly modern look.

How is Durinox® surface created?
The unique surface is made with shot blasting technology, as used in the aerospace industry. During the process, 1 billion steel balls are blasted at almost 200mph into a stainless steel sheet. The result is that the blasted stainless steel is twice as hard as conventional stainless steel, and has a distinctive, soft and elegant look.

Durinox® is soft to the touch, like velvet and surprisingly warm. Its muted reflective surface gives it an aesthetic subtlety.

Marks are less visible on a Durinox® Stainless Steel surface because objects come into contact with less surface area.

Unsurpassed. BLANCO SILGRANIT® PuraDur®.

Sink: METRA XL 6 S, SILGRANIT® PuraDur®, White
Tap: BLANCOCULINA-S, Chrome
Accessory: Plastic corner caddy

The best made even better.

SILGRANIT® PuraDur® strikes the perfect balance between strength and beauty. It is easy to care for because of its resistance to stains, marks and limescale.

SILGRANIT® is wonderfully tactile, a smooth and silky stone-like surface that is warm to the touch and available in a range of contemporary colours with the identical surface characteristics that combine perfectly with the rest of your kitchen choices.

Long-lasting and unbeatably easy to look after thanks to the advances BLANCO has made in the production of SILGRANIT® PuraDur®. The material offers an ease of care

unsurpassed by other coloured composite sinks. Unsurpassed scratch resistance, heat-resistance to 280°C and resistance to damage in domestic use.

SILGRANIT® PuraDur® guarantees 100% suitability for food use, 100% household cleaning product resistance and the colour will not fade. The patented hygiene protection formula Hygiene+Plus is a shield against dirt and bacteria making the material antibacterial and safe for food preparation.

SILGRANIT™ PuraDur™ with the patented hygiene protection formula

Easy-care

Stains and signs of use can be removed easily with a scouring sponge and water.

Scratch-resistant

Extremely strong and scratch-proof. SILGRANIT® PuraDur® is not damaged by the normal use of knives.

Heat-resistant

Sinks made of SILGRANIT® PuraDur® are heat-resistant to 280°C.

Impact-resistant

The tremendous impact resistance protects the sink against damage, e.g. by a falling saucepan.

Hygienic

Hygiene+Plus is a shield against dirt and bacteria, and makes cleaning easier.

Safe for food use

All kinds of foods can be prepared directly on the SILGRANIT® PuraDur® sink.

Acid-resistant

SILGRANIT® PuraDur® is resistant to acidic household cleaning products and foods.

Non-fading

The colour also remains unchanged even in direct sunlight.

Pleasantly natural

The silky-smooth surface and very finely-pored closed surface create a soft stone-like character that is wonderful to the touch.

Our latest colour addition **Lava Grey**, exclusively for the BELFAST sink, bringing a new, contemporary update to a country-style ceramic classic.

*available on limited ranges
**only available on BELFAST

Unbeatably easy to clean

Due to its smooth surface, BLANCO Ceramic is naturally easy to clean, so little effort is required.

Scratch and cut-proof

Thanks to the strong, hard surface, using the sink never leaves any marks (except when Ceramic knives are used).

PuraPlus® coating

The PuraPlus® coating makes the surface even easier to clean. Dirt finds it almost impossible to adhere to the surface.

Non-fading

The colours of BLANCO Ceramic products never change, even in direct sunlight, but retain their original beauty for many years to come.

Heat and cold-resistant

BLANCO Ceramic sinks are fired at over 1200°C, so hot pots and pans of up to 280°C can safely be placed in or on them.

High blow and impact-resistant

BLANCO Ceramic is a strong, dense natural material that can easily cope with the usual domestic sink activities.

Acid-resistant

Whether vinegar, lemon juice or beetroot, standard domestic acids, lyes and other substances leave no traces and cannot cause any damage.

Hygienic and suitable for food preparation

The surface is hygienic and neutral in taste and odour, which has been confirmed in tests by the ISEGA Institute.

Certified quality

Regular voluntary quality tests confirm the high standards that apply to the material and design.

NEW
Summer
2020

Impressively elegant.
Remarkably intense.
Sinks and bowls in Black, defining kitchen design.

For aficionados of top-end design, personally planning a kitchen with black elements can represent either the ultimate expression of confidence or of elegant understatement. SILGRANIT® PuraDur® Black from BLANCO is a new colour with captivating depth, opening up a vast array of design options for creating high-contrast kitchens or timeless elegance.

SILGRANIT® PuraDur® Black creates two breathtaking effects: it sets strong accents in kitchens with pale worktops and furniture, while capturing the sense of restrained luxury in completely black kitchens. Thanks to its subtle depth, new Black from BLANCO leaves scope for creating a unique impression – combine it with furniture, vases, lighting, pictures

and more. Black is a way of visually grounding an interior, whether used as the main aesthetic or as a frame to let other colours breathe. SILGRANIT® PuraDur® Black unites all of the interior elements with a sense of calm, poise and elegance.

Enhances almost any style of interior design with SILGRANIT® PuraDur® Black. Our full range of PuraDur® sinks and bowl designs are available in the sumptuous new SILGRANIT® PuraDur® Black, and soon a range of SILGRANIT®-look taps will add to the design options with essential design elements to create a flawless interplay of shades, providing expressive accents or a captivating overall impact.

SILGRANIT® PuraDur® Black features optimised material properties: the deep Black from BLANCO impressively boasts the advanced characteristics of the SILGRANIT® PuraDur® material, which is extremely scratch-proof, heat-resistant and resistant to acid damage and breakage. The fine-pored surface of the material is impervious to water, dirt, limescale and even metal abrasion. This keeps BLANCO's graceful Black looking impeccable, despite daily kitchen use.

Available from Summer 2020, new SILGRANIT® PuraDur® Black is worth the wait. Our full range of SILGRANIT® PuraDur® sinks, bowls and selected SILGRANIT®-look mixer taps will be available in the stunning new colour.

Bowls in SILGRANIT® PuraDur® Black create a high-contrast effect when paired with white worktops and brass mixer taps.

Must-have design element: the LINEE-S in SILGRANIT®-look Black will be available Summer 2020.

Elegant understatement: sink and mixer tap in SILGRANIT® PuraDur® Black nestle perfectly into dark worktops.

NEW

A harmony of contrasts.
Black matt – timelessly beautiful

Sink: METRA XL 6 S,
SILGRANIT® PuraDur® in Concrete Style
Tap: CATRIS-S Flexo, Black matt

The Black matt finish from BLANCO is timelessly beautiful. Unobtrusive yet striking. Adding black metalwork and detailing to interior design can be found more and more often outside of its city loft and industrial property conversion roots. The hard-wearing, uniform powder coating gives a compelling depth of colour that accentuates the shape of the mixer tap.

CATRIS-S Flexo Black matt.

A semi-professional mixer tap in a classic design, bound to delight enthusiastic home cooks. Sporting an array of practical features: the flexible high-pressure spout is surrounded by a durable hose and has a maneuverable pull-out spray. In addition, the practical dual spray allows you to switch from a steam to a jet spray at the touch of a button. The new Black matt finish makes this already impressive tap look like it was born from the furnaces of heavy industry.

LINUS-S Black matt.

The LINUS-S has been one of BLANCO's most popular range of mixer taps for a number of years. This is due, in no small part, to its contemporary design: the wide cylindrical base with its transverse control lever exudes stability, without appearing bulky. With an extending spray, the LINUS-S offers greater flexibility for kitchen tasks. The new Black matt finish takes the ever-popular LINUS design and gives it an urban, industrial revamp.

NEW

Urban industrial in a contemporary tap with all the modern conveniences – LINUS-S in Black matt.

Created to excel in pressure situations the CATRIS-S range are born to perform.

The classic styling of ENVOY is emphasised in Black matt with chrome accents.

NEW

100°C instant filtered.
Engineered to be better.
BLANCO TAMPERA Hot.

Tap: TAMPERA Hot, Chrome

HOT

The BLANCO TAMPERA Hot with five-stage filtration and titanium boiler as standard. Why choose the BLANCO TAMPERA Hot? It's quite simple really.

Instant, beautifully filtered, 100°C boiling water at the twist of a child-safe lever from an ultra-safe, super-hygienic and taste free titanium boiler, delivered through an insulated spout that doesn't get hot. With a five-stage filtration system and a digital Flowmeter as standard, not as an optional extra like many other competitors. The TAMPERA Hot has simply been engineered to be better.

blanco.co.uk/tampera

The specification busting TAMPERA Hot system is designed to leave plenty of space in a standard 600mm cabinet.

NEW

Superbly measured.
Superbly precise.
BLANCO EVOL-S Volume.

Tap: EVOL-S Volume, Stainless finish UltraResist®

VOLUME

The BLANCO EVOL-S Volume delivers the exact amount of water you want at the touch of a button. Thanks to its integrated measuring function, simply set your required quantity using the rotary control and get precisely that amount of water with the intuitive touch-button.

Follow recipes with ease, create healthy juice drinks or simply fill the kettle with just the water you need, saving energy along the way!

blanco.co.uk/evol

Not only does the EVOL-S Volume deliver precisely the amount of water you need, with the additional benefit of a pull-out spray, you can make sure it goes exactly where you want it to.

NEW Tastes good.
Feels great.
BLANCO FONTAS-S II Filter.

Tap: FONTAS-S II Filter, Chrome

FILTER

The BLANCO FONTAS-S II Filter is one of the smartest filter taps available. It's rare to find a pull-out spout spray tap that delivers hot and cold flow plus freshly filtered water via separate nozzles.

The spout allows flexible use around the sink, making it easy to fill household appliances like your kettle or coffee machine reservoir with pure, filtered water.

A fresh solution that simply tastes great! Available in Chrome or Stainless finish UltraResist® and with or without the pull-out spray.

blanco.co.uk/fontas

With a five-stage BWT filter, the FONTAS II family offer beautifully purified water and the spray version makes clean living that little bit easier.

NEW

Impressively engineered.
Inspiringly innovative.
BLANCO SOLENTA-S Senso.

Tap: SOLENTA-S Senso, Stainless finish UltraResist®

SENSO

The semi-professional kitchen tap just got promoted, in the shape of the SOLENTA-S Senso from BLANCO. Control the water with a wave of your hand, or pot, or pan.

A smart tap that is setting new standards with its innovative sensor technology, start-stop function and dual-jet spray. The intelligent motion sensor activates and deactivates the water flow completely touch-free.

Keep germs at bay by simply waving your hand under the sensor, keeping dirty fingers off the tap control lever.

blanco.co.uk/solenta

The clever sensor control makes a huge difference to daily life – all of a sudden you don't need that extra pair of hands.

Concrete-style: distinctive and on-trend.

Our new SILGRANIT® PuraDur® colour simulates the unique texture and appearance of Concrete.

The METRA sink range is modern, versatile, popular and usable in all sorts of spaces. It is just as striking in Concrete-style, with a large amount of surface on display – the METRA is a perfect platform to showcase this new SILGRANIT® finish.

The combination of different materials signal 'industrial chic'. Expressive wood, black metal finishes, steel and Concrete elements create a unique composition, complemented by the PLEON bowl range, now available in industrial Concrete-style.

The selected models from the ETAGON range fit perfectly into natural, subtle Scandinavian designs that combine pale wood and Concrete. This multi-functional range and the unique Concrete-style finish are also ideal for smaller kitchens.

Super durable SILGRANIT® PuraDur® is now also available in a unique **Concrete-style**. Whether you are creating a modern Scandinavian, urban-style or an industrial inspired space – our new Concrete-style sinks fit the bill.

The authentic Concrete shade provides a constant source of fascination. Its distinctive appearance seems to change as you move around it – the matt, polished and satin areas catch and refract the light beautifully.

Every sink is unique, and no colour gradient is exactly the same. A contemporary, standalone piece that dovetails perfectly with architectural concepts and modern spacial design.

Concrete-style SILGRANIT® PuraDur® combines ease of care and robust material properties with a striking appearance and wonderfully tactile feel.

CLASSIMO 45 S-IF

CLASSIMO 6 S-IF

CLASSIMO XL 6 S-IF

One bowl, two rails, three levels. BLANCO ETAGON.

Sink: ETAGON 500-U, SILGRANIT® PuraDur®, Tartufo
Tap: PANERA-S, Brushed Stainless Steel
Accessory: Stainless Steel ETAGON rails (included)

Three is the magic number.

Three tiers, three materials and three installation methods. Cleverly designed bowls in a range of installation options, an integrated ledge and ingenious rails that create a new working level, and super-practical BLANCO accessories. Three things that will turn your kitchen sink into a space-saving, time-saving, creative hub.

ETAGON: the ultra-versatile range of three-level sinks.

Multiple working levels:

1. Bowl level – for rinsing, washing and general use
2. Ledge and rail level – for draining, drying and soaking
3. Surface level – for preparation and serving

Quality material choices:

1. Stainless Steel
2. SILGRANIT® PuraDur®
3. Ceramic PuraPlus®

Installation options:

1. Undermount – fitted below your work surface
2. Inset – mounted, with a rim, into the worktop
3. Inset flush – set into the worktop (Stainless Steel only)

Rinse, drain and prepare food or wash, soak and dry dirty dishes at the same time. Keep the water and clutter contained within the three levels of the sink space, thanks to ingenious accessories, the innovative rails and integrated ledge designed into ETAGON sinks.

Soak the stubborn dirt from potatoes whilst letting those freshly picked and rinsed herbs drain as you prepare the vegetables.

Larger format bowls open up even more options to prepare food with ease, keeping the whole process contained.

Finished the task at hand? Hide the colander away under the thin-profile food board which sits perfectly across the bowl.

Washing up made easy with the addition of a mobile drainer and the versatile combination ETAGON ledge and rails.

Brilliant:
the three-tier
sink system.
BLANCO ETAGON.

Sink: ETAGON 700-U, SILGRANIT® PuraDur®, Anthracite
Tap: BLANCOCULINA-S, Stainless Steel finish
Accessory: Stainless Steel ETAGON rails (included)

Sink: ETAGON 500-IF/A, Stainless Steel
Tap: PANERA-S, Brushed Stainless Steel
Accessories: Stainless Steel ETAGON rails (included) and
BLANCO SensorControl® Blue automated pop up control

The space-saving, time-saving, creative hub.

The multi-level system creates convenience through clever and unique functionality. ETAGON extends the simple bowl with a ledge detail, a pair of rails and a host of perfectly matched accessories. The ETAGON bowl design has all the versatility of a sink with a drainer, yet requires much less space.

The integrated ledge combined with the specially developed ETAGON rails creates three working levels in and around the modern bowl. Placed in the centre, the rails will accommodate items such as pans and steam cooking containers. When the chopping board is placed on top, vegetables can be handled while other ingredients are rinsed in the bowl. Baking trays can be easily washed in the large individual bowls.

Baking trays can be easily soaked and cleaned in the spacious individual bowl.

The heat-resistant ETAGON rails can also be used as a trivet.

Perfect for placing kitchen utensils, e.g. lids and bottles.

Your choice of colour and material. The wonderfully versatile ETAGON range comes in an equally diverse range of material and colour options.

Choose from classic Stainless Steel, four colours of Ceramic, ten colours of SILGRANIT® PuraDur® and now the inset mounted ETAGON is available in our brand new Concrete-style stone composite.

An installation method to suit you. The hugely practical inset style sinks are built with a frame that sits on top of the work surface.

Many Stainless Steel ETAGON sinks can also be flushmount, this is where the frame is inset into the surface to sit flush with the worktop – also available with or without a tap ledge at the back.

The third option is the increasingly popular and visually low-impact undermount installation method.

ETAGON SILGRANIT® PuraDur® comes in ten colours and now the inset sink is also available in our new Concrete-style.

Undermount options are perfect for use with worktops in natural or composite stone materials, ceramic, metal or glass.

The CLARON family, designed and hand-crafted by BLANCO STEELART® experts, are now available in Durinox®. The stunning clean lines of the CLARON bowls boast a delicate 10mm radius corner detail, creating a harmonious design and softened shapes.

The wonderfully tactile Durinox® surface has a soft, velvety feel that adds to the aesthetics with muted reflections. It's also tougher, more scratch resistant and easier to keep looking stunning than standard Stainless Steel.

CLARON 500-IF/A, Stainless Steel Durinox®

The benefits of Durinox® at a glance:

- Unique material innovation: specially finished surface with velvety-matt look and homogeneous structure
- Enhanced scratch-resistance: over twice as hard as conventional Stainless Steel surfaces
- Less impervious to fingerprints than conventional Stainless Steel surfaces
- Easy to care for and clean

Perfect design and function.
CLARON bowl with Durinox® surface.

Bowl: CLARON 500-IF/A and 700-IF/A, Stainless Steel Durinox®
Tap: PANERA-S, Brushed Stainless Steel

The velvety-matt Durinox® surface is a real all-rounder: more scratch-resistant, easy-care and easy to clean.

The CLARON Durinox® bowl models with integrated tap ledge are all equipped with the intuitive BLANCO PushControl® pop-up remote control button and the InFino® plug and strainer system.

The elegant CLARON Durinox® bowl also comes in a number of undermount versions.

The CLARON IF/A features a Durinox® bowl with a rim and tap ledge finished in brushed Stainless Steel. Ideal to match our range of Stainless Steel taps.

BLANCO
STEELART

An elegant play of materials.

BLANCO Durinox® bespoke worktop with integrated SILGRANIT® PuraDur® undermount bowl.

Custom worktop: Durinox® Stainless Steel with SolidEdge design
Integrated bowl: SUBLINE 500-U, SILGRANIT® PuraDur®, Anthracite
Tap: LINUS-S, SILGRANIT®-look, Anthracite

Mixed materials – contrast and complement.

Stainless Steel is cold and unforgiving right? It is utilitarian, industrial and medical, isn't it? Take another look, it actually absorbs and reflects its surroundings, becoming part of the ambiance of the space.

Here, the Stainless Steel worktop should be in contrast to the wood grains yet it seems to complement them effortlessly. The mixed metals gel as the work surface gently reflects the golds from above. While the Anthracite of the bowl and mixer tap create negative space by contrasting the work surface powerfully.

Discover the art of combining materials and finishes with STEELART®.

The latest arrival is a custom-made Stainless Steel worktop in Durinox® finish with a harmoniously integrated flush undermount bowl from the SUBLINE range in SILGRANIT® PuraDur®.

The elegant bowl, featuring strong lines and a silky, stone-like surface, flows almost seamlessly into the worktop. The dark Anthracite SUBLINE bowl appears in contrast to the velvety-matt Stainless Steel surface of the worktop. This unique combination of materials is striking and exclusive to BLANCO.

The SUBLINE bowl, specially adapted for integration into STEELART® worktops, is designed for installation into the 60cm cabinet.

An exciting yet harmonious mix of materials: Anthracite bowl in SILGRANIT® PuraDur® combined with the velvety-matt Durinox® Stainless Steel surface.

The SUBLINE bowl is mounted almost flush with the worktop to create a precision detail.

Traditional elegance. Modern sophistication.

VILLAE® Farmhouse sinks and
VICUS® traditional taps.

Sink: VILLAE® Farmhouse single, Ceramic, Crystal White
Tap: VICUS® Bridge twin lever, Brushed Brass

Country classic – VILLAE® Ceramic sinks.

If your style is more traditional than modern, and you want that sought-after country farmhouse look, consider one of the BLANCO VILLAE® range.

Available in a variety of styles and sizes including the large, apron-fronted single or double bowl farmhouse sinks or the bowl and a half and bowl and a third options that can be installed either inset or undermount.

VILLAE® range

Perfect partners – VICUS® traditional taps.

The stunning elegant design of the VICUS® family ensures these taps will be the centerpiece of your kitchen design. Engineered to the highest standards, the range features swivel spouts, period styled levers and detailing. The single lever model features a pull-out spray – for an extra touch of modern convenience. The family is available in a range of traditional finishes from chrome right through to brushed brass.

VICUS® range

VICUS® colours

The VILLAE® double Farmhouse bowl features a central tap ledge so you can choose if you put the tap there or on the work surface.

The large format of the single bowl VILLAE® Farmhouse is perfect for large pots, pans and even pets.

The bowl and a half and the bowl and a third VILLAE® bowls can be fitted undermount or inset into the worktop.

Whether you opt for the apron-front or the integrated installation options, the VILLAE® exudes period charm.

BLANCO InFino®.

Perfectly integrated strainer and waste system.

InFino® plug and strainer system

InFino® is the innovative strainer and waste system for BLANCO sinks. The stylish and contemporary design offers a streamlined look, while the impressive functionality and ease of control of the InFino® strainer sets new standards.

The superior strainer:

- Elegant design
- Flushmount design
- Unique intuitive control concept; optionally with remote control
- Service-friendly construction thanks to fast and simple valve installation

Intuitive control concept. In the manual version, the outflow is opened and closed by turning the InFino® strainer to the right or left. In contrast to other up-and-down waste options, this does not change the position of the strainer and the perfect looks of the sink centre are always maintained as it stays flush within the base of the bowl.

Sinks with the new InFino® strainer system are shown with the following icons to suite the type of drain system.

InFino® with remote control

InFino® manual

InFino® and SILGRANIT® PuraDur® – unique flush feel.

Extremely easy to clean thanks to the almost flush integration with no rims or edges.

Perfect ease of care. InFino® can be dismantled into only two components for easy cleaning: the plug in the outlet and the strainer.

Unique control. The strainer is always central and always remains flush whether opened or closed.

Optionally with pop-up remote control. The remote controlled version may be fitted at any time.

InFino® and Ceramic – expression of exclusivity.

Flexible, convenient, clever.
BLANCO foldable grid for sinks and bowls.

Foldable grid

It's often clever accessories that make everyday kitchen tasks so much more convenient. The new foldable grid is one such accessory, an all-rounder that is ideal as a draining rack or as additional space for placing things to drain, dry or cool above the bowl – and it makes a practical addition and trivet for the work surface too.

The foldable grid is made of high-quality Stainless Steel rods, connected by flexible, slip-proof silicon strips. This makes it stable, but also flexible: for instance, it can be set up in a zig-zag, allowing wine glasses to be laid in a secure tilted position to dry. When it is not being used, it can be folded up to save space and stowed at the edge of the sink or in the base cabinet.

Stacked up, the foldable grid will easily sit in a drawer or the unit space beneath the sink.

Laid out flat as a trivet on the work surface or a drainer/drying rack placed over the bowl.

Pitch up the grid in the middle to create a secure space for delicate or awkward items.

NEW

The smart choice.
BLANCO SensorControl® Blue.

BLANCO SensorControl® Blue automated pop-up remote control

Are you looking for something a bit more advanced?

How about upgrading your sink features to fit in with the smart solutions in your high-tech kitchen? We have developed just what you need in the form of the elegant SensorControl® Blue. Open and shut your InFino strainer waste with just a touch, turn or press of the SensorControl® Blue, even with wet fingers.

- Modern sensor control with blue lighting ring
- Durable, high-quality Stainless Steel
- Elegant, flat design
- Works with wet fingers or when wearing gloves
- Low power consumption and easy to clean
- For use with the BLANCO InFino® strainer system

Wet fingers or wearing cleaning gloves? No problem – touch tap or turn to activate the InFino® strainer.

Low profile, minimal design is easy to clean and easy to use.

Little details and features like SensorControl® Blue come from BLANCO's 95 years of expertise in Stainless Steel.

Classic. Timeless. Beautiful.
Stainless Steel sinks and bowls.

Sink: AXIS III 6 S-IF, Stainless Steel
Tap: CARENA-S Vario, Chrome
Accessory: Food board Walnut wood

With 95 years' experience in kitchen technology, design and manufacturing, BLANCO offers the ultimate in Stainless Steel quality and craftsmanship. A Stainless Steel sink is classic and timeless, and integrates beautifully in any kitchen environment.

Stainless Steel has a natural appeal with excellent characteristics that makes it the perfect material for kitchen sinks.

BLANCO only uses the highest quality Stainless Steel that is selected in accordance with specific criteria and is subject to strict quality checks.

The results are first-class BLANCO Stainless Steel sinks that meet the highest requirements for material, functionality and design. BLANCO Stainless Steel sinks are made to last a lifetime.

Beauty, strength, durability. BLANCO SILGRANIT® PuraDur®.

Sink: AXIA III XL 6 S, SILGRANIT® PuraDur®, White
Tap: CARENA-S Vario, Chrome/White
Accessory: Bridging Ash wood compound food board

SILGRANIT® PuraDur® sinks and bowls by BLANCO.

Often copied, never matched. Every year, more customers worldwide put their trust in the original – SILGRANIT® from BLANCO. We are delighted at this, and work very hard to keep it that way. We have come a long way and are continually developing SILGRANIT® even further. It goes without saying that we use only the very highest quality materials in our granite composite sinks, SILGRANIT® PuraDur® is composed of quartz sand, acrylic matrix, silicone, fluoropolymers, minerals and colour pigments.

Why do we use these components and what do they do? Quartz sand is the hardest component of granite. It can withstand domestic use with ease – say a pot crashes into the bowl while you are filling it with water, your SILGRANIT® sink will be able to cope. Perhaps you accidentally scrape the bottom of a pan, heavy dish or some cutlery across the surface – if there is a mark left, it will wipe away with a little water and minimal effort. You can even cut things on your sink without leaving a mark, although we recommend using a cutting board ideally. We're only satisfied when you are. We want your sink to be as beautiful, clean and radiant after many years as it was on the day it was installed in your kitchen. Find out more at blanco.co.uk/silgranit

Cleaning and maintenance.

Tips for the right care.

BLANCO sinks, with innovative functions and materials, go a long way toward making life in the kitchen easier. After all, the sink plays a major role in every home, it's where we spend 60% of our kitchen time.

Your kitchen sink frequently comes into contact with food, chemicals and a variety of liquids, so maintenance is important. All sink materials require a level of ongoing care to ensure they continue to look great, are safe and bacteria free – even if they contain anti-bacterial qualities.

Stainless Steel

Stainless Steel, by its nature, is not completely impervious to scratches in general use. For a short period after installation, some usage marks are unavoidable. However, over time and regular care, the surface appearance will settle into the lustrous Stainless Steel finish you expect.

- Daily cleaning will ensure dirt simply wipes off with a damp soft cloth or sponge
- Ensure you dry the surface with a microfibre cloth to avoid limescale build up and prevent against stains and marks
- Our tip against stubborn limescale: a solution of 20% vinegar, 80% water or water with a little lemon juice

SILGRANIT® PuraDur®

Our stone composite sinks contain 80% quartz sand, which is the hardest element of granite. Thanks to these hard-wearing properties and the Hygiene+Plus antibacterial shield coating, SILGRANIT® PuraDur® sinks are truly easy to care for. However some maintenance is still advised to ensure lasting quality and appearance.

- Regular wiping will ensure dirt simply wipes off with a damp soft cloth or sponge
- Light limescale marks can be removed with acetic acid or other commercially available products that are intended for this material
- Discolouration and staining are caused by limescale that absorbs liquids such as coffee, tea, or red wine after drying – in most cases, these marks may be removed with the coarse side of a washing-up sponge

Ceramic

Ceramic is a natural product, created in a series of special processes that incorporate decades of our team's experience. BLANCO Ceramic is naturally easy-care due to the particularly hard, non-porous, glazed surface. This is especially true for our PuraPlus® finish, a special seal that smooths and refines the surface of the glaze, further preventing limescale, staining and standing water.

The ultra-resistant properties and characteristics of BLANCO Ceramic with PuraPlus® prevents dirt from penetrating, so usually a simple wipe is all it takes to clean it. Water and a little washing-up liquid are all that is required. A soft microfibre cloth will ensure that the surface is irresistibly lovely again. A mild vinegar-based solution or all-purpose cleaner can also be used.

Sink and tap features explained.

Sinks

Cabinet width

 The cabinet width measurement denotes the measurement (mm) which the sink bowl(s) need to fit into.

Sink style options

-  **Inset:** The frame of an inset sink sits on top of the work surface. These sinks are compatible with any work surface, including laminate worktops.
-  **Undermount:** An undermount sink is installed underneath the worktop, only compatible with solid surface worktops such as granite or solid wood.
-  **Belfast:** Belfast sinks are installed either 'dropped-on' to a purpose-built cabinet or by using installation brackets.

Inset sink profiles
BLANCO sinks come with a range of different profiles.

-  **Standard inset:** The rim of the sink or bowl is positioned onto the edge of the cut out in the work surface.
-  **IF and IF/A:** Unique 1mm flat edge profile for inset and flushmount installation.
-  **IFU:** Suitable for inset, flushmount and undermount.

Bowl configuration and handing
Ensure you choose the correct sink configuration for your kitchen.

-  **LHB, RHB and UNI (Universal):**
Indicates whether an inset sink is available with a Left Hand Bowl (LHB).
Or Right Hand Bowl (RHB).
-  UNI (Universal) indicates an inset sink suitable for both left and right configurations.
-  If the sink does not have a drainer, the handing refers to the Main Bowl.
- 

Taps

Water pressure

-  BLANCO has a range of taps suitable for low and high pressure systems.
-  BLANCO considers taps 0.3 bar and below as low pressure.

Features

-  **Aerator:** Mixes air into the flow of water to give a champagne-like flow. Some taps are fitted with a flow straightener; however, some of our taps are fitted with an aerator which are highlighted by this icon.
-  **Pull-Out Spray:** Features a pull-out spray, useful for directional rinsing.
-  **Colour options**
-  **Dual Flow**
-  **Recommended solid work surface worktop or SILGRANIT® sink:**
Alternatively with the use of a tap stabilising bracket.

Tap finishes and colours

Finish range

SILGRANIT®-look colours

When it comes to buying a kitchen tap, you should never compromise.

What counts above all else is quality. For 95 years now, BLANCO has been at home in the kitchen, developing versatile sinks, sink accessories, mixer taps and waste systems. Perfecting solutions to make life run a little more smoothly. The humble kitchen tap is anything but humble in the modern household. From smart solutions, boiling water and filter taps through to stunning Stainless Steel taps with spray functions – there is a tap to suit your life, your style and your space.

The perfect finishing touch in every style.

Smart taps

Innovation, style and functionality are key in the BLANCO Smart tap range. From instant boiling water to helping you measure water direct from the tap, or an auto sensor to turn it on and off, our Smart taps have it all.

Semi-professional

Inspired by taps used in professional, commercial kitchens, semi-pros feature special details such as pressure sprayers, flexible spring coils and handspray holders.

Mixer taps

From ultra-modern to traditional styles, from classic kitchen to European influenced designs, the BLANCO tap range has something suitable for everyone.

Tap pressures – gravity systems.

Maximum/minimum pressure requirements for average flow rates are quoted in bar. Where 'head' is indicated (vertical height from the tap to the underside of the cold water storage tank) use as an approximate guide only. The conversion to 'head' is based on the assumption that the tap is fitted directly below the storage tank. Long pipe runs across the property from storage to tap may result in reduced pressure and poor hot water performance. Where minimum pressure is quoted, minimum performance should be expected, for optimum flow rates greater pressure will always be an advantage.

Smart innovations.
Features for your lifestyle.
Smart taps – making life a little easier.

BLANCO EVOL-S Volume
Exactly the right amount of water, every time. The integrated measuring function and touch control make it simply smart.

BLANCO FONTAS-S II Filter
A five-stage filter ensures the purest of water. The pull-out spout makes all the difference.

BLANCO TAMPERA Hot
Boiling, filtered, taste-free water in an instant. A hot water system that is engineered to be better, as standard.

BLANCO SOLENTA-S Senso
Control the water with a wave of your hand, or pot, or pan. This professional tap just got a promotion.

BLANCO smart taps

NEW

100°C instant filtered.
Engineered to be better.
BLANCO TAMPERA Hot.

Tap: TAMPERA Hot, Chrome

The BLANCO TAMPERA Hot 3-in-1 tap delivers cold, warm and instant boiling water from a single mixer tap.

Everything about the TAMPERA Hot is quality. From the filtered water quality to the construction and components, from the expertly engineered system to the digital control feature. The boiling water comes from a 4 litre water boiler made of extremely resistant, taste-neutral, hygienic titanium. The water in the boiler is heated to 105°C to ensure that bacteria is thoroughly eliminated.

Before heating, the water is purified with a high-quality BWT five-stage filter. The filter reduces limescale and contaminants, leaving the water perfectly PH balanced, improving both the water quality and taste. Filtered, boiling, taste-free water, from a child-safe tap and an ultra-safe titanium boiler, as standard. There aren't lots of additional, optional extras as with many other hot taps, it's simply been engineered to be better from the start.

The BLANCO TAMPERA Hot – a cool, smart innovation that makes everyday life a little easier.

Boiling water flows when the safety button is pressed and sprung knob is turned at the same time.

The insulated spout and low-spray flow of aerated water protect your hands from the heat.

Designed to fit into a 600mm cabinet, leaving plenty of storage space.

BLANCO smart taps

NEW

Superbly measured.
Superbly precise.
BLANCO EVOL-S Volume.

Tap: EVOL-S Volume, Stainless finish UltraResist®

Perfection is everything working precisely.

The EVOL-S Volume from BLANCO, thanks to its integrated measuring function, provides exactly the amount of water that you need. Set your required quantity using the rotary control and get precisely that volume of water with the touch of a button. The EVOL-S Volume is the perfect Smart Tap when precision is key. The right amount of water in your fitness shakes, economically filling the kettle, the perfect amount of water for that culinary masterpiece or exactly the right amount of water for a baby's formula mix.

The dynamic flow control system provides intelligent control of the water flow: the greater the amount of water you want, the more powerful the jet and the faster the water flow. This means no unnecessary waiting.

EVOL-S Volume is available in Chrome and Stainless finish UltraResist® to match your sink or bowl perfectly.

Use the rotary dial to set the exact amount of water that you want – delivered in small increments from 100ml to 5 litres.

Tap on the intuitive touch control button and the set amount of water dispenses from the mixer tap.

Use the second lever to mix cold and warm water in the usual way.

In a high-quality metal finish, the pull-out spout gives you more movement around the sink.

BLANCO smart taps

NEW

Tastes good.
Feels great.
BLANCO FONTAS-S II Filter.

Tap: FONTAS-S II Filter, Chrome

Fresher, cleaner, purer, deliciously filtered.

When you're really thirsty, there's nothing better. And when you're making tea, putting together your own bottled water or making ice cubes, you want to know that you have high-quality water you can rely on.

An integrated BWT five-stage filter purifies your mains water, reducing limescale, removing metal content and other particulates that can effect the taste.

In addition, the high filtering capacity extends the usage intervals, meaning that the filter cartridges do not have to be changed as often.

The BLANCO FONTAS-S II Filter is the smartest filter tap available, its pull-out spout delivers warm and cold flow PLUS filtered water via separate pipe and nozzle. This spout allows flexible use around the sink, making it easy to fill household appliances like your kettle or coffee machine reservoir with filtered water. A fresh solution that tastes great. Available in classic Chrome or stunning Stainless finish UltraResist®.

The FONTAS-S II is unique among filter taps with this high specification filter system. It features a pull-out spray yet still delivers the filtered water through a separate flow and nozzle.

BLANCO smart taps

NEW

Impressively engineered.
Inspiringly innovative.
BLANCO SOLENTA-S Senso.

Tap: SOLENTA-S Senso, Stainless finish UltraResist®

Ever needed an extra pair of hands in the kitchen?

Heavy pan in one hand, glass of wine (or something more practical) in the other. How do you turn on the tap to add a splash of water to your masterpiece?

The SOLENTA-S Senso from BLANCO is here to help, setting new standards with its innovative touch-free, start/stop motion sensor technology.

Designed ergonomically, the sensor is positioned to ensure it is easy to turn on or off with a gentle wave of your hand or a pot – but avoids accidental activation.

The flexible hose with its magnetic holder allows you to expand the range of action around the sink with ease.

On top of all these plus points, this classy smart mixer tap also saves water, meaning additional cost savings to take advantage of. Plenty of reasons to celebrate, even if you have your hands full.

The sensor is intuitively accessible, turning to wherever you want the water to flow.

The sensor's near field detection function responds to any movement within an ergonomically optimal distance of up to 6cm.

The dual spray hose gives you the choice of a jet spray for washing remnants of food off your dishes, or a wide spray for filling pots.

The Stainless finish UltraResist® is particularly easy to clean and scratch-resistant, and does not show fingerprints.

Ideal accessories.

Making things a little more straightforward.

Foldable grid – creates a working surface and draining space over the sink or a countertop trivet.

Often it's the little things in life that make the biggest difference. For example, fitting a sink with accessories can make it even more convenient while also making it more attractive.

When preparing food, multifunctional accessories can help you save time and contain the mess within the sink area.

For instance, you can create more space with a rack that fits inside the bowl, it acts as another working level, and makes an excellent trivet on the work surface as well.

Innovative concepts and high-quality materials transform BLANCO sink centres into modern kitchen workplaces with no need to compromise.

Soap dispensers that match many of our tap ranges, integrate perfectly in the sink area. They are easy to fill from above, and can also be added to most sinks at a later date.

More information about our accessories is available at blanco.co.uk/accessories

Corner-Caddy for food and dishes, but also a practical storage surface for washing-up utensils.

Positioned on the edge of the bowl, the **Top Rails** form a bridge over the sink that allows the user to work on two levels.

The kitchen is the heart of every home, and it is not uncommon for the modern kitchen to be a multi-function room. It's obviously a place to cook and eat, but also to study, work, read and watch television. Choosing the right type of lighting needs to be considered at an early stage. The electrics have to be installed at the start of the project, before the plastering, decorating and fitting has taken place.

Good kitchen lighting can make a modest kitchen appear impressive, whilst a larger contemporary kitchen looks stunning with your eye drawn to expensive features through effective lighting. The key to a successful kitchen lighting scheme is to layer the different types of lighting according to use.

Choose stylish kitchen lighting for your home.

Task lighting

Utilising the latest technology. These lighting kits will illuminate working areas. Available in contemporary designs, with 'plug & play' connections. Available in two or three light kits.

Feature lighting

Our bespoke offering can draw attention to specific objects, features or shapes in a room. Ideal for Island units, plinth lines or on the underside of the work surface.

Finishing touches

Remote controls allow for the lighting to be zoned throughout the kitchen. Our four zone controller can independently switch or dim each area enabling task lighting to be dimmed to give the effect of mood lighting.

WiFi solution

Control your lighting from your phone, simply plug in compatible lighting systems into the WiFi Solution and control your lighting from the Mi-Light Cloud app or your connected devices.

Cool White

Cold and clinical. Ideal for a contemporary high gloss finish. 6000-6500k.

Neutral White

Ideally placed between Cool & Warm. The 4000k Neutral White is becoming increasingly more popular.

Warm White

Warm and homely. Ideal for wood or traditional farmhouse style kitchens. 3000k.

Every kitchen, big or small, needs efficient task lighting. You will need this to ensure that food preparation and cooking takes place safely without shadows. BLANCO offer an extensive range in surface fitted or recessed LED lights utilising the latest generation of technology. The 'COB' (Chip On Board) LED lights give a uniform light with a wide beam angle and higher light levels. The 'High Definition' range offers conventional LED'S matched with an optical lens to maximise light output.

All of the kits offered by BLANCO come complete with a matched power supply and full instructions. All of the LED lights offer high light outputs with long life, cool running and minimal running costs. Most are available in Warm, Cool or Neutral White. Warm White LED'S give a soft orange/yellow

light which mirrors a traditional tungsten or halogen light source. Cool White is colder and is particularly suitable to modern high gloss kitchen design. If you require something inbetween, Neutral White would be the perfect alternative.

Care must be given to the colour temperature of lights so they all match, for example the main ceiling lights, pendants or extractor hoods. The illustration shows the different effects of Warm, Cool & Neutral White on a wall.

Quadrant Aluminium task

Surface Aluminium task

Feature lighting.
Create an impact.

Create a relaxing atmosphere with bespoke LED strips around the island.

Create an impact with an illuminated glass light box.

Add a soft ambience to your kitchen with plinth lighting.

Feature lighting can draw attention to specific objects, features or shapes in a room. Careful placement of light can accentuate any object.

Using our versatile bespoke self-adhesive tape can make a feature of island units. Used around the plinth line or on the underside of the work surface, it can give the illusion of the furniture floating. This can be used to mirror the effect on the rest of the kitchen furniture as well as on top of the cabinets as an effective 'wall-washer'.

The colour changing tape can be used in the same way with the ability to pre-set an endless array of colours with the remote. This can result in a stunning effect behind frosted glass doors.

Bespoke self-adhesive flexible LED strip (blue).

Bespoke self-adhesive flexible LED strip (green).
